8K@60Hz HDMI SWITCH 4X1

Advanced EDID Management

It can support to auto down-scaling so a 8K video input can automatically be down scaled to a 4K or 1080p output when connecting a display that only supports resolution up to 4K or 1080p. Also supports to down scales 4K video input to a 1080P output.

Immersive 8K@60Hz | 4K@120Hz High Resolution Visuals

Supports resolutions up to 8K@60Hz/4K@120Hz/4K@60Hz, also downwards compatible. It is ideal for PS5, XBOX Series X or other 8K UHD Sources.

G-Sync and Free Sync Technology

Free Sync and G-Sync technology enable VRR (Variable Refresh Rate), so gamers don't get the screen tearing or visual latency associated with having VSync disabled, nor do you get the stuttering or input lag associated with using VSync.

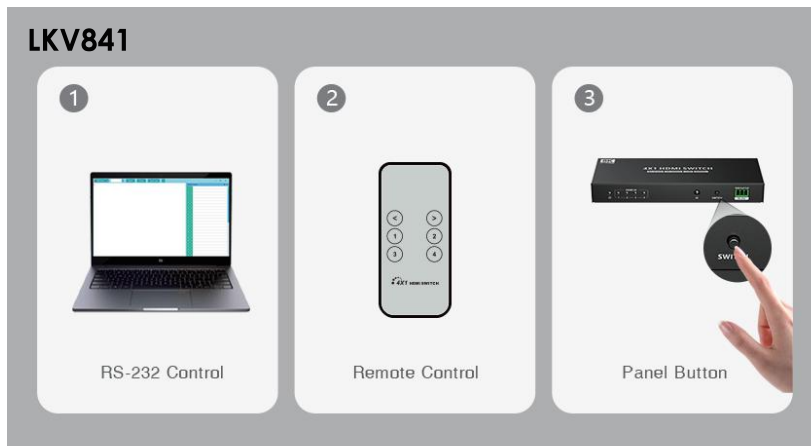

Digital Audio Extraction

Utilizes the audio extraction feature to separate audio from source videos to an external audio system via the S/PDIF port. Compatible with various leading audio technologies like Dolby Atmos, Dolby Digital 7.1, Dolby TrueHD, DTS:X, DTS-HD and LPCM 7.1.

HDR10+, HDR10, Dolby Vision

With the feature of supporting HDR10, HDR10+, and Dolby Vision content, you can enjoy movies and videos in never-before-seen details, gamers also get life-like video quality on their latest gaming consoles.

Auto & Manual Switch

Features auto switch and manual switch via IR remote, RS-232 control or Switch button, auto switch is turned on by default, it can be turned off by your preference.
